## **1-1/2 QUART STAINLESS STEEL ULTRASONIC CLEANER**

If you are looking for a way to clean your gun parts faster you need to go to the link above and order this ultrasonic cleaner

We have tested it and it works great. The ultrasonic vibration helps break the bond of material stuck to gun parts and in the process heats up for added cleaning assistance. The cleaner does not come with a lid but an aluminum cake pan works great as a lid. Just put

1 ½ quart of CU-6 or RS-98 in the container and set the timing dial to 30 (this is an internal timer and the dial will not move it just shuts off when time expires) and walk away. When you come back you will find that any cured poly will just basically fall off the surface and hard a-side only material you can peel off a lot faster. If you have questions please give us a call we are currently using this unit in our shop and having great success with it.

- Powerful, durable and affordable
- Solid-state circuitry
- Rocker on/off switch with light
- Stainless steel wire grate
- Overall dimensions: 9.3" H x 10.3" L x 6.3" D
- Tank size: 4" D x 9" L x 5-1/4" W
